What turned off the flood of Evil Empire epithets ?
What explains the idiotological shift from Enemy-bashing in IX/85 to Bear-hugging in XII/88 as the Papa Bear (MSG) seized the initiative at the UN? the faithful can only recall the Hitler/Stalin embrace of yesteryear.
GKG has touched on this paradox (IX & XII/88) and believes the answer lies in its second modification of KA 007's course (page 3)
The plane's debris, such as it was, washed up on the beaches of the Sea of Okhotsk.

ERGO, QED, PDQ: KA 007 was exploded over the Sea of Okhotsk.
When the Soviets found the corpus delicti, they used it quietly, firmly, diplomatically to improve the environment by pushing Peace into every nook and cranny of this neighborhood we all call Earth.
the US Paper-Tiger was told to change its spots and it now follows the Sitting-on-Top-of-the-World Bear wherever he roams.
the dismantling of all professional war machines proceeds apace as negotiation, the logic of understanding, respect and civility refurbish the climate at the UN.

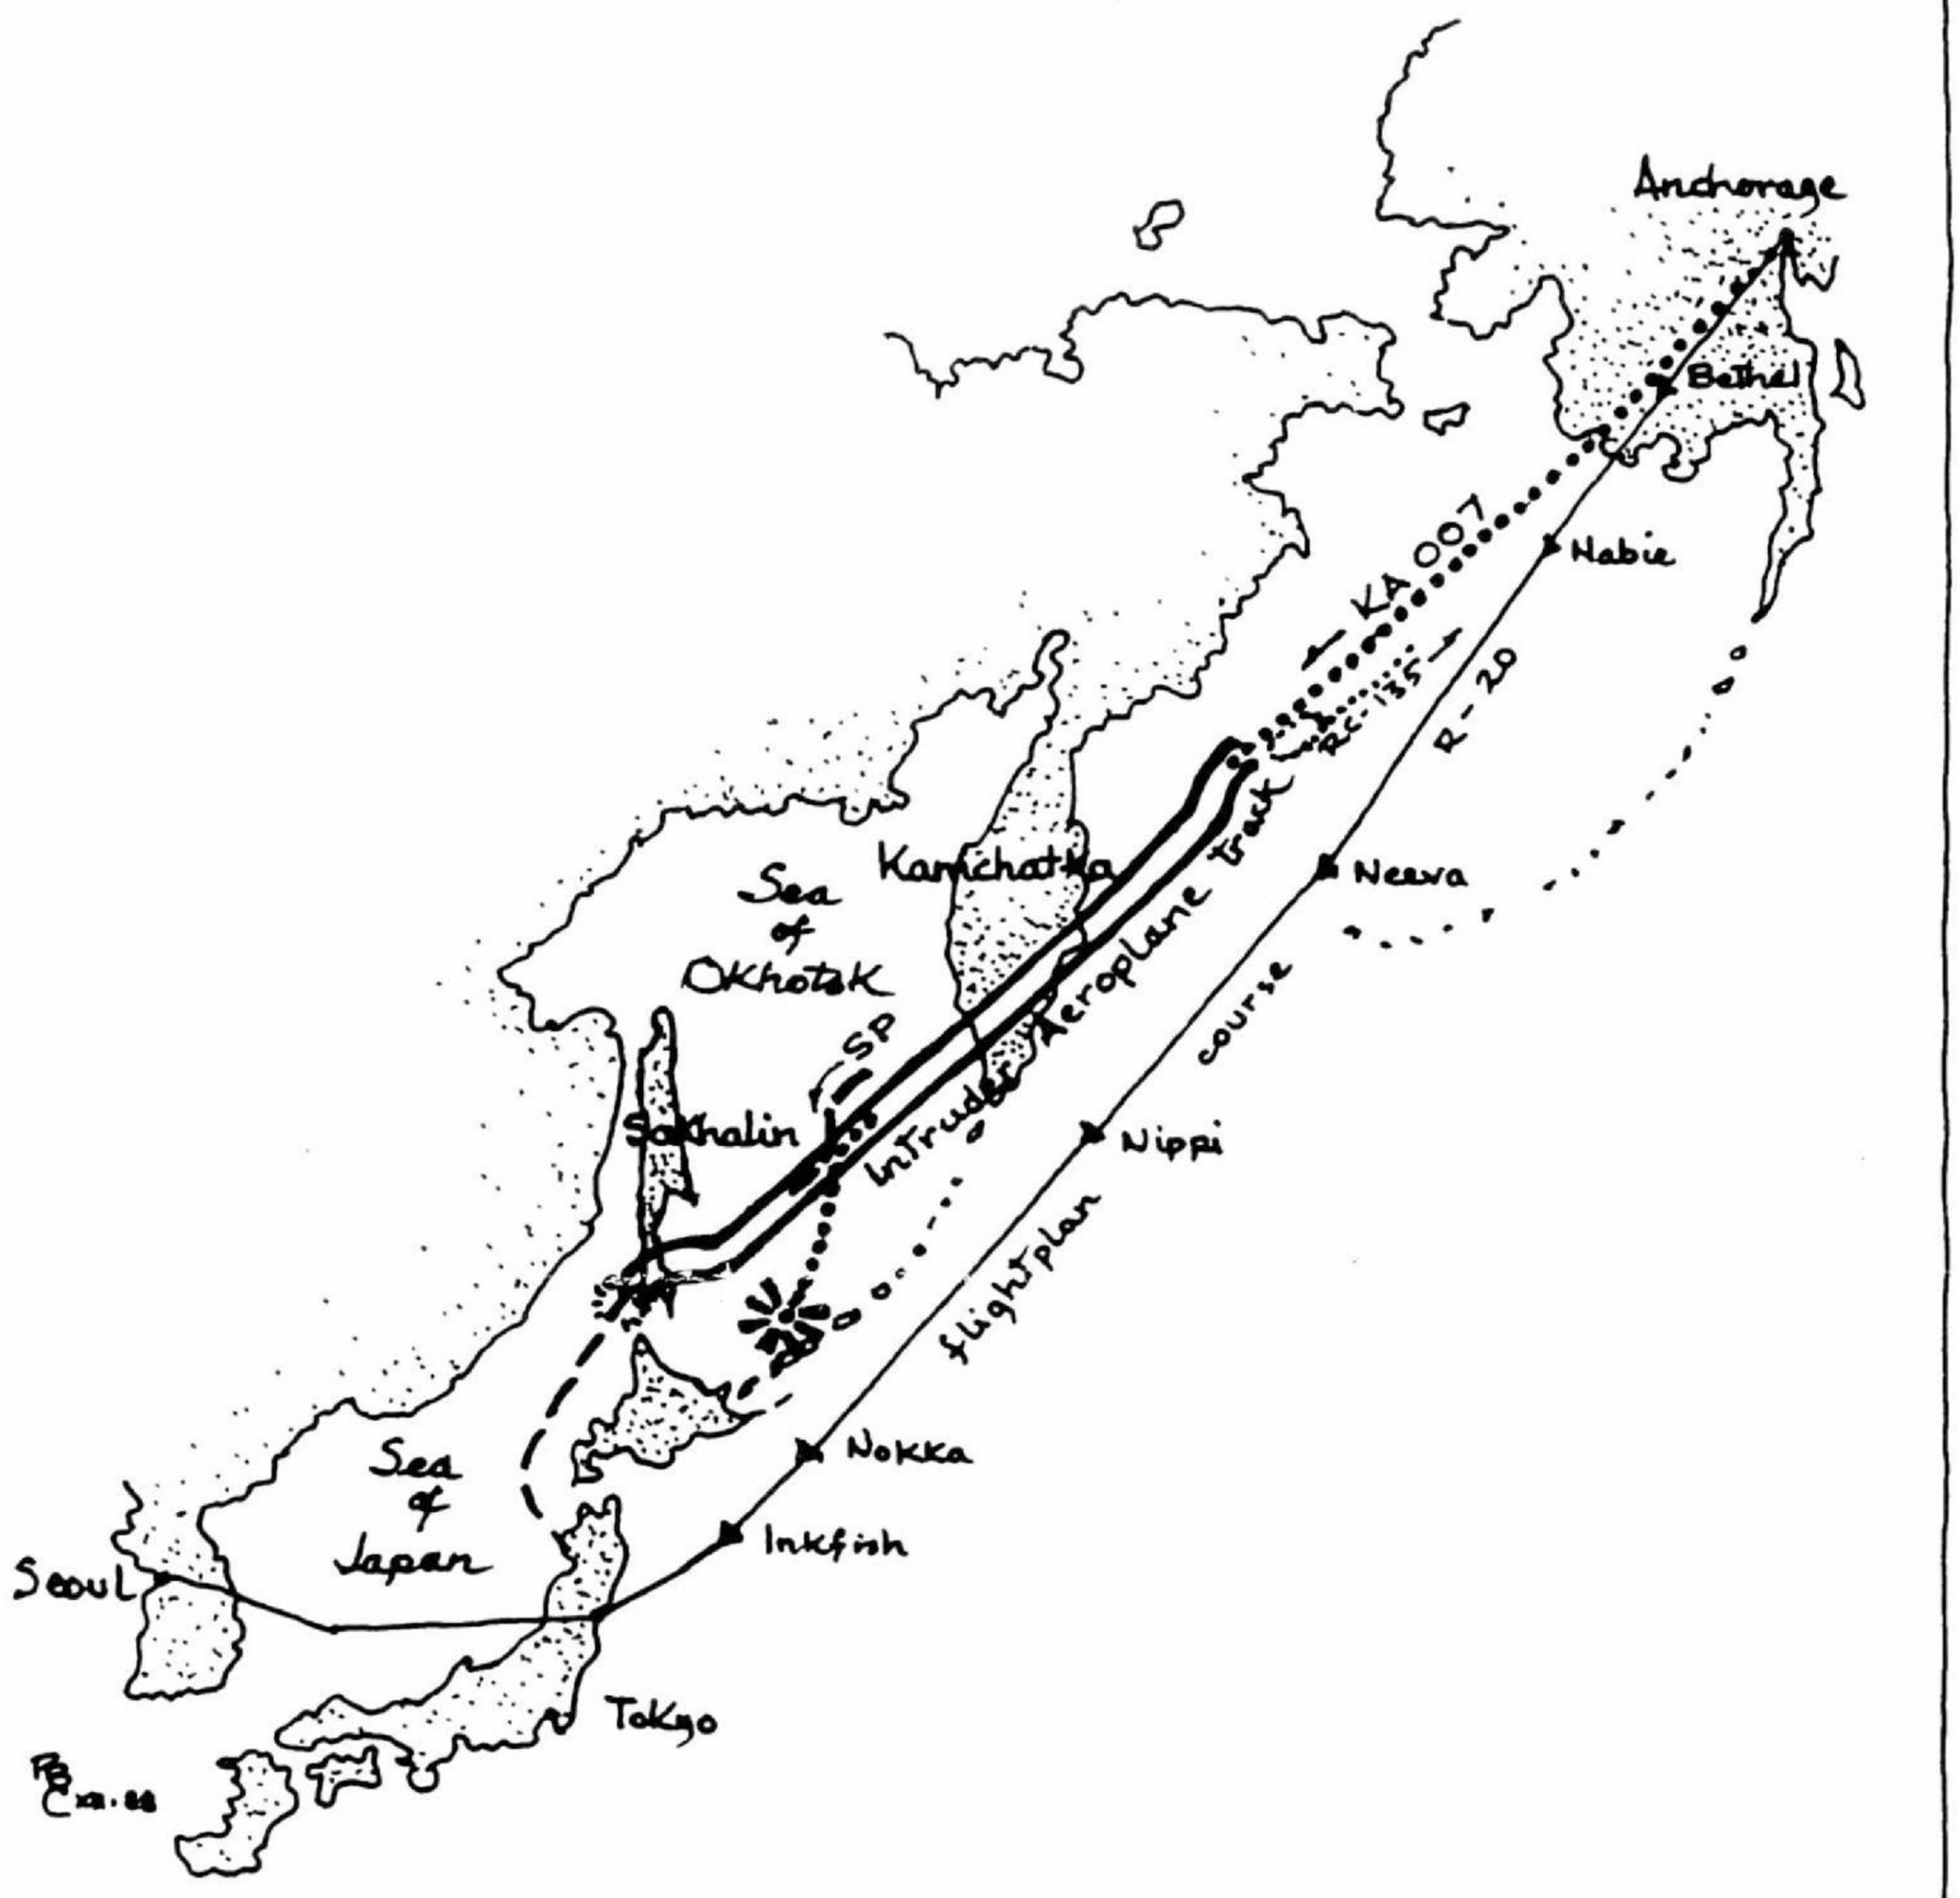
THE FLIGHT of KA 007 ~ modification 2 - XII·88



KA 007 departs Anchorage (upper right), drifts northerly off course R-20, radio-ing false checkpoint positions.
A one-blip dance with an RC-135 patrol inserts KA 007 as the Russian's Intruder Aeroplane. After the Kamchatka traverse, a one-blip dance with a Stealth Prototype, SP, inserts it as Intruder Aeroplane for Sakhalin's traverse. KA 007 cuts out heading for Inkfish.
Seconds after a fighter-pilot's missile-launch at SP over The Sea of Japan, KA 007 is remotely exploded over The Sea of Okhotsk.

GKG·3·· II/89

THE MOLES OF THE POTOMAC

Twenty-and-a-half hours after KA 007's disappearance, the US Secretary of State went on national TV and accused the USSR of shooting down a civilian airliner and killing all 269 aboard.

The chronology of events after "shootdown" stands as mute testimony to a conspiracy to defame and its coverup by persons whose names should be as common as dirt to everyone. Executive Branch bureaucracy cannot continue to be a safe house for desplicability forever.

EDT : Wednesday, VIII/31/83

1424 : USSR's time for rocket-launch at the intruder aeroplane over Sakhalin Island
1434 or at least by
15Ø6 : NSA, Misawa, Japan, informs NSA, Ft Meade, MD, KA 007 is missing

1619 : Tokyo informs KAL, Seoul "something is very wrong"
163Ø : Tokyo asks Khabarovsk for info on KA 007
1655 : Tokyo's DISTRESS alert to everyone concerned

17Ø8 : teleconference between Clark and Meese in Santa Barbara and Shultz, Casey, Burt and Eagleburger in Washington DC
: JMSA starts search around KA 007's "last position" (NOKKA)
175Ø : Khabarovsk replies it has no info on KA 007

182Ø : Korean Broadcasting, Seoul TV, airs bulletin: KA 007 missing

193Ø : JDA reports to JMSA Wakkanai radar tracked a plane 100 miles NE on southwesterly track which disappeared at 1829 (1429EDT)
: Japan's Chief Cabinet Secretary, chief of domestic policy, is informed KA 007 shot down
2ØØØ : Chief of domestic policy starts 60-minute meditation

21ØØ : VP KAL on Seoul TV, is interupted by message from a friendly country : highly probable plane is safe on Sakhalin
214Ø : NSA Watch Officers' teleconference in Washington DC links KA 007 to Russian pilot's missile-firing

2215 : State Dept alerted that KA 007 was off course and may have been shot down
222Ø : South Korean government "obliged to believe plane shot down"

223Ø : short-wave radio news item gives KA 007's "last position" as 113 miles south of Nemuro
: in Santa Barbara Clark tells Reagan plane is down and passengers apparently safe

23ØØ : short-wave radio news item reports the "safe on Sakhalin" bulletin (see 21ØØ) and gives USCIA as source
: State Department informs Congressman Larry McDonald's brother plane is down and passengers apparently safe

(cont'd)

The MOLES (cont'd)

EDT : Wednesday, VIII/31/83

2310: first vessels start search west of Sakhalin
: Central Intelligence Agency will neither confirm nor deny it is source of "safe on Sakhalin".
2345 : Duty officer at Pentagon National Command Center tells a McDonald aide : it looks like a shootdown.

EDT : Thursday, IX/1/83

ØØ3Ø : Moscow learns of KA 007's identity from another source

Ø12Ø : Japanese Embassy in Moscow asks Soviet Foreign Ministry if KA 007 is on Sakhalin
Ø13Ø : Clark tells Reagan KA 007 is in the water
Ø145 : Foreign Ministry replies plane is not on Sakhalin
Ø15Ø : Japanese tapes of fighters' transmissions received in DC

Ø2Ø5 : TASS reports on Moscow radio KA 007 has disappeared and search by Japanese at last contact, 80km east of Hokkaido, has produced no results
Ø215 : Shultz confers with Clark over proposed statement

Ø3ØØ : White House officials told KA 007 shot down
Ø33Ø : McDonald's staff informed by Western Goals, Seoul, plane has been shot down

Ø45Ø : Soviet Foreign Ministry says plane is not on Soviet territory

Ø53Ø : Japanese Intelligence Service confirms plane is shot down

Ø615 : Korea's Minister of Culture and Information, on Seoul TV, says the plane has been shot down, he does not know where and there are no survivors

Ø815 : Shultz, using the precise timing on the tapes, briefs Clark

1Ø1Ø : Reagan is told KA 007 has been shot down
1Ø45 : Shultz on national TV, blames the USSR for KA 007 shootdown

Clearly twenty-and-a-half hours is overly long to report a "shoot-down" known within 30 minutes of missile-launch and four "last positions" between 150 and 400 miles apart is confusing to say the least.

Meanwhile during the morning of Thursday, IX/1/83 :

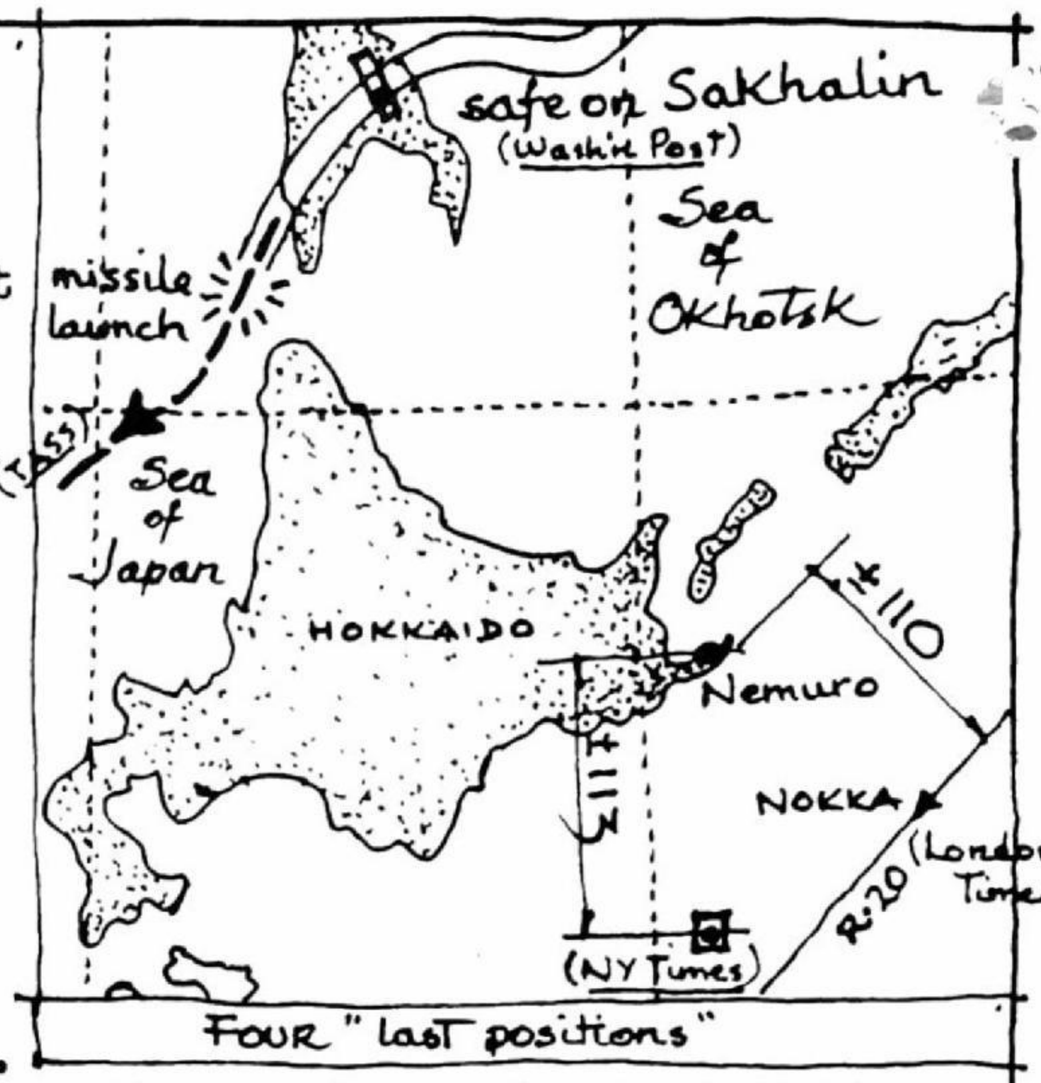
Moscow : An unidentified plane entered the airspace of the Soviet Union ....but the intruder did not react to signals and warnings from Soviet fighters and continued its flight in the direction of the Sea of Japan. (TASS)

London : JUMBO JET DISAPPEARS WITH 269 ABOARD .... reported in its (cont'd)

the MOLES (cont'd)

(London): last radio message that it was passing over a point 42.23° north and 147.28° east about 110 miles south and east of Hokkaido .. Times [NOKKA.GKG]

" Y : Korean Jetliner ...has been forced down and all .... are believed safe ....but an airline official in Seoul said an explosion might have occurred in mid-air ... at that point [3:23 am, 2:32pm EDT] the crew said the airliner was 113 miles south of Nemuro ... Times



Washingotn, DC :Missing airliner ... landed safely today on the Soviet Island of Sakhalin after it had been missing for hours .... Post

Sunday, IX/4/83
At a White House meeting between President Reagan and Congressional leaders, an aide, in foreground, plays tape recording said to have been made as the Korean airliner was tracked and shot down.
(photo caption, NYTimes)

Friday, IX/9
...not a single piece of debris has been found in nine days of intensive search....
(NYTimes)

Saturday, IX/10
...other metal fragments ...were found...near Hamatombetsu on the Sea of Okhotsk ...the child's body was also found in the Sea of Okhotsk but further east and about 125 miles offshore ...(NYTimes)

Police have found a second body floating off the northeastern coast of Hokkaido ... in Abashiri .... currents aided by strong winds from the north may push more debris toward the Japanese coast....
(Austin American-Statesman, IX/11/83)

Monday, IX/12
...debris from the downed airplane ... [has] washed ashore from the Sea of Okhotsk along the northern Japanese island of Hokkaido ...
(NYTimes)

(cont'd)

the MOLES (cont'd)

Reading between the lines of the above chronology, with courteous apologies to W S Gilbert, GKG's longrange design is set forth within the Mikado's entrance, Act III :

My object all sublime, I shall achieve in time,
To let the evidence fit the crime, the evidence fit the crime.
And make each taped event, nit-wittedly media-bent,
A scourge of publicized punishment, of ridicule's merriment.

Reverting to page 2 and Sherlock Holmes' ministrations :

When you have eliminated the impossible....

It is impossible for four navies, searching for 60-odd days and nights in the shallow waters of the Sea of Japan for a B 747, complete with black boxes, cargo, luggage and 269 bodies, to go home, as they did, empty-handed, IF, as the Reagan Administration averred, that plane plunged into that sea.

It is impossible to place KA 007 over Sakhalin. The intruder aeroplane over that island, mislabelled KA 007 in every article, book and airhead show, except of course, the GKG Hour and EXPLO 007 ($10, GKG Partners, this address) flew away home in level flight at 32,000 ft "in the direction of the Sea of Japan".

.... whatever remains, no matter how improbable, must be the Truth.

It is improbable that debris, found along the northeast coast of Hokkaido, 9 days after "shootdown", avoided the 2-month, 4-navy search by floating thru the Soya Strait to Hamambetsu and Abashiri. That debris, in the waters washing that northeast coastline, came from KA 007's explosion over the Sea of Okhotsk.

It is improbable that the unnatural 20 1/2-hour delay in "shootdown's" formal announcement was due to anything but chicanery, coverup, fabrication, you name it. Preceded as it was by four differing "final position" newscasts, it is not surprising that five years after the fact John Horgan's Scientific American article finds the only piece of evidence that places KA 007 over Sakhalin for shootdown into the Sea of Japan, a 55-minute tape of air-to-ground fighter-pilot chatter, is at best a misrepresentation. The Nation's Christopher Hitchens calls it a lie.

GKG's position in all this is one with the evidentiary wind.

From The Flight of KA 007 (X/84) thru EXPLO 007 (VII/85) to GKG Dividend IX/88, the plane was never off course Romeo-20. After reading Pearson's version of the coverup, we agreed in part and modified the flightpath to traverse Kamchatka, but not Sakhalin. This, the second modification on page 3, II/89, moves explosion from over the Pacific to somewhere over the Sea of Okhotsk, diagramming when, approximate where, and how, allowing us to move closer to Who and Why.

(cont'd)

The MOLES, the DOVES concluded

The search for a motive behind the Potomac Moles' contrivance was first jogged by Johnathan Marshall's story of the wiping out of the CIA station in the US embassy bombing in Beirut. Revenge, always a basic ingredient of the CIA's Old-Boy mix, took but four months to concoct the likelihood of a Russian fighter-pilot's shootdown of a civilian airliner.

Next, CIAB's story of Andropov's readiness to start pulling Soviet troops out of Afghanistan IX/1/83,only reinforced the obvious. PWM's real enemy, Peace, was to be repulsed for the umpteenth time; the 1960 U-2 "shootdown" was the teenth.

Guided by the covert side of Project Democracy, with Stealth-type radar-jamming equipment aboard as insurance and as frosting on the Fleetex North Pacific War Games cake, Captain Ch'on quietly drifted northerly past Bethel toward insertion as the "intruder aeroplane". After traversing Kamcahtka, he as quietly yielded to a Stealth-prototype, SP, plane for the Sakhalin leg. Having loaded an extra ten thousand pounds of fuel at Anchorage, Ch'on was prepared to land "safe on Sakhalin" thereby providing some real fireworks for the upcoming celebration in Seoul.

Unbeknownst to any but the need-to-know few, revenge rode shot-gun on this junket. Within seconds of the fighter's missile-launch, the planned relatively happy ending was turned into a successful, ingloriously bloody sacrifice.

Seven weeks after the Okhotsk inhumanity, the CIA's destabilzation of Maurice Bishop's socialist government "of the people, for the people and by the people" brought about the gang-assassination of the Prime Minister and five close associates, paving the way for the Gipper to stand ignorant, arrogant but tall on the rubble of the bombed-out mental hospital in Grenada.

The Kremlin Doves, having located KA 007's remains, used all these backbreaking straws to send its hawks packing. The Doves' logic of understanding not only included their own shortcomings but also the fragility that protects Earth from the temperatures of Venus. More to the immediate point was the belief that laughter and trust can and must contain,and eventually eliminate, the Moles' military solution, Force, if life on this planet is to continue.

GKG offers this explanation of why evil-empire bashing simmered into summitry and quiet (Okhotsk) diplomacy not only changed the tune the Moles shouted but also the climate within which the world everywhere is currently negotiating termini to what forever appeared to be engagements with endless enemies. Continuance of this blissful state of affairs is now in good claws.

The Kremlin Doves are smiling, and the world is smiling too;
The lonesome Moles of the Potomac are aghast, but smiling-through.
